Methodology. Sources: Oracle SuiteApp documentation (NetSuite AI Connector Service, MCP Standard Tools) and MokuBot v1.4.291 source (release branch, May 2026). Where the connector exposes a capability only via SuiteQL on the underlying table, we mark it Partial. Where the table is closed to SuiteQL (e.g. Workflows, Bundles, Datasets) we mark it Not supported. If something here is out of date or inaccurate, write us at inbox@mokuhub.com and we'll correct it.
